

XDCAM HD

1 to 60fps overcrank

Camera 25fps

Pictures (Mute)

12 sec cache

Tape/Disk

EDIT MEDIA

Example: The Shark will breach at some point.
We don't know when, so using the cache we can
guarantee the shot as we have a 12 sec loop/cache before the event.

It is also possible to shoot timalapse as we did on film.
From 1 frame every 1 second to 6 frames every 1hour.
